Morphologic changes within the sample have interfered with the reticulocyte count. Actual platelet count may be higher than reported. Please confirm with a blood film. Contact IDEXX Support for further assistance.

\* Confirm with dot plot and/or blood film review.

1. Increased RDW - Anisocytosis present - review blood film.
2. Increased MCHC or MCH - Consider hemolysis (including sample collection/handling), lipemia, and Heinz bodies.
